What is claimed is:

1. A battery mounting structure for use in a small watercraft comprising a vessel body having a hull comprising a lower portion of the vessel body, and a deck for covering placement on top of the hull, an engine disposed in the vessel body, a drive shaft extending rearwardly from the engine for driving a propeller, and a drive shaft supporting box for supporting the drive shaft at the midsection thereof,

said battery mounting structure comprising a battery support tray for supportively holding a battery thereon and a contacting member integrally formed with said battery support tray for contacting part of a drive shaft supporting box;

wherein at least part of said battery mounting structure is adapted for placement on top of the drive shaft supporting box.

- 2. The battery mounting structure of claim 1, further comprising at least one securing strap for use in securing said battery to said battery support tray.
- 3. A battery mounting structure of claim 1, further comprising structure for

accommodating any one of a number of different-sized batteries.

- 4. A battery mounting structure of claim 1, wherein said battery tray comprises a plurality of hooks to receive securing straps thereon to secure a battery to said battery mounting structure.
- 5. A battery mounting structure of claim 1, further comprising drain holes selectively located about the horizontal surface thereof.
- 6. The battery mounting structure of claim 1, further comprising a platform section integrally formed with said battery tray for supporting a magnet box thereon.
- 7. The battery mounting structure of claim 6, further comprising at least one reinforcing rib extending between said battery tray and said platform section.
- 8. A method of mounting a battery in a personal watercraft having a

longitudinal axis, said method comprising the steps of:

- a) installing a battery mounting apparatus in said personal watercraft behind an engine and above a drive shaft support box of said watercraft;
- b) placing a battery on a support tray of said battery mounting apparatus, and
- c) placing battery restraints on said battery to hold it in place on said support tray, whereby said battery is emplaced proximate the longitudinal axis of said watercraft.
